7th ESO–ESMINT–ESNR Stroke Winter School

Goals

The primary goal of the ESO–ESMINT–ESNR winter school on acute interdisciplinary stroke treatment is to join young stroke physicians and young neuroradiologists in order to enhance interdisciplinary management of patients with acute ischaemic stroke. A series of concentrated high quality teaching sessions and courses on acute stroke management will be offered.

Secondary goals of the winter school are to perform «hands-on» courses for interventional neuroradiologists and special teaching sessions for stroke physicians.

The winter school is unique in its kind. Combining plenum sessions, discussions and technical training, it will foster improvement in treatment of cerebrovascular disease and advance research in this complex field, leading to technical developments.

Target audience

Young stroke physicians and neuroradiologists with a major interest in cerebrovascular diseases are eligible. Applicants should currently be in training in a European teaching hospital that treats acute stroke patients. The organizing committee will select 30 interventional neuroradiologists and 30 young stroke physicians based on their

- application
- country of origin
- the expected benefit to the individual and to his/her stroke unit and country

Since the main aim of the course is to enhance interdisciplinary stroke management, **pairs of neuroradiologists and stroke physicians from one institution will be preferred.** If there are available places, applications from non-European countries and single applicants may be considered by the organizers. The final decision about the participants remains with the local organisation committee.

Scientific content

A daily teaching program in English by experts in all subspecialties of acute stroke treatment will be held. There will be joint sessions for neuroradiologists and stroke physicians in the morning. In the afternoon there will be special courses for stroke physicians and «hands-on» courses for interventional neuroradiologists. Teachers will be local, national and international experts in this or related fields.

Tentative core faculty

The local organising committee will form a tentative core faculty with representatives of all three participating organisations, i.e. European Stroke Organisation (ESO), European Society of Minimal Invasive Neurological Therapy (ESMINT), and European Society of Neuroradiology (ESNR).

Course venue

sitem insel AG, Freiburgstrasse 3
Departments of Neurology and Diagnostic and Interventional Neuroradiology
University Hospital Bern
Freiburgstrasse 10
CH-3010 Berne, Switzerland

Costs

The costs of the ESO–ESMINT–ESNR Winter School will be borne by the organizers. However, to cover a part of costs for board and lodging participants will have to pay a share of € 400.–. Furthermore, participants have to cover their travel expenses, their activities outside the official program, and any other personal expenses during their stay.

Deadline for application: 30. October 2019
